The figure shows a genomic map of the 0445-0448 region. The x-axis represents the genomic position in base pairs (bp), with major ticks at 50479, 550979, 551479, 551979, 552479, 552979, and 553479. The map displays four genes: 0445/pgi, 0446, 0447, and 0448. Gene 0445/pgi is a long blue block starting at 50479 bp and ending at 551479 bp. Gene 0446 is a blue block starting at 551479 bp and ending at 551979 bp. Gene 0447 is a blue block starting at 551979 bp and ending at 552479 bp. Gene 0448 is a blue block starting at 552479 bp and ending at 553479 bp. A grey 'x' marks a deletion site at 551979 bp, which is the end of gene 0446 and the start of gene 0447. The genes are represented by blue blocks with a wedge shape on the right side, indicating the direction of transcription. The genomic position (bp) is labeled below the x-axis.
